## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement filed 8/4/2005 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered. The examiner has crossed out the references, which were not considered.
2. The references listed on the information disclosure statement filed 6/1/2005 have all been crossed out due to all of those references being listed on the information disclosure statement filed 8/4/2005.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Pat. No. 5,215,286 (Kolenc). Kolenc discloses a controller comprising a valve body (16), a fluid channel (20), a valve stem (78), a casing (82), an operating rod (100), drive means (98, 110, 112), force amplifying means (116), a tapered member (element 130 is smaller than element 98 and therefore is tapered, therefore the profiled of the bottom side of the piston is tapered), a disk member (140), a first pivotal member (118) pivoted about axis (122), a second pivotal member

Art Unit: 3751

(120) pivoted about axis (128), each pivotal member (118, 120) having a plate body (figure 1), an upper contact face (touching element 130), a lower contact face (134 and 136), and the lower contact face having a circular arc (outside portion adjacent element 122 and 128)

*Allowable Subject Matter*

5. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

*Conclusion*

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Pat. No. 5,556,072 (Itoi et al.) discloses a controller having force amplifying means.

U.S. Pat. No. 5,516,075 (Itoi et al.) discloses a controller having force amplifying means.
